

Phi1 control test: polarizer at first-NPBS D, PD retained at final F

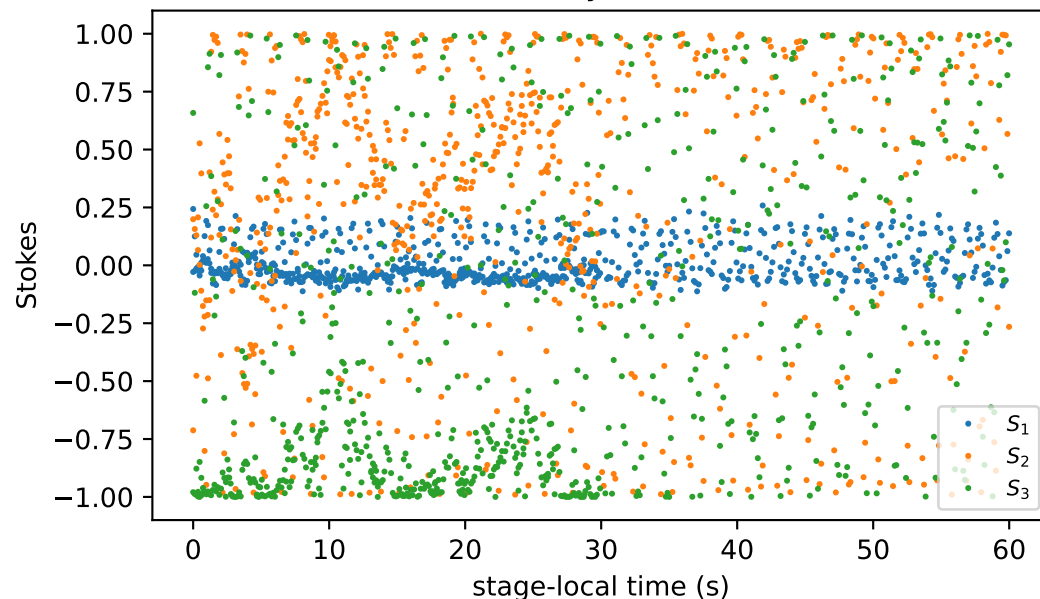

D-port polarizer: intended phi1 analyzer

Final-F monitor: ideally constant

PAX state after analyzer (should be fixed)

Command-authority summary

metric	value
PAX analyzer contrast	0.003
PAX analyzer R^2	0.002
PD F contrast	0.044
PD F R^2	0.004
PAX static std	1.37e-05
PD static std	0.00701
